

## Contents

### NUMBER 1

- i Editorial
- 1 *D. J. Stewart*. A meander-belt sandstone of the Lower Cretaceous of Southern England
- 21 *Andrés Maldonado and Daniel Jean Stanley*. Clay mineral distribution patterns as influenced by depositional processes in the Southeastern Levantine Sea
- 33 *John S. Bridge*. Bed shear stress over subaqueous dunes, and the transition to upper-stage plane beds
- 37 *Michael R. Rampino and John E. Sanders*. Evolution of the barrier islands of southern Long Island, New York
- 49 *Thomas C. Pierson*. Dominant particle support mechanisms in debris flows at Mt Thomas, New Zealand, and implications for flow mobility
- 61 *John A. Breyer and Arthur J. Ehlmann*. Mineralogy of arc-derived sediment: sili-clastic sediment on the insular shelf of Puerto Rico
- 75 *Renzo Valloni and J. Barry Maynard*. Detrital modes of recent deep-sea sands and their relation to tectonic setting: a first approximation
- 85 *Stuart D. Ludlam*. Sedimentation rates in Fayetteville Green Lake, New York, U.S.A.
- 97 *Stefan Lüthi*. Some aspects of two-dimensional turbidity currents
- 107 *Kate Kranck*. Particulate matter grain-size characteristics and flocculation in a partially mixed estuary
- 115 *N. Lancaster*. Grain size characteristics of Namib Desert linear dunes
- 123 *Sedimentation Seminar*. Comparison of methods of size analysis for sands of the Amazon-Solimões Rivers, Brazil and Peru

#### SHORT COMMUNICATION

- 129 *P. L. de Boer*. Mechanical effects of micro-organisms on intertidal bedform migration
- 133 *G. Fily and M. Rioult*. Development of relief on a Middle Jurassic cemented sea floor: underwashing of a sponge-microatoll prior to cementation and colonization in the Bathonian of Normandy: Reply by T. J. Palmer and F. T. Fürisch
- 141 Book reviews
- 149 Forthcoming papers

### NUMBER 2

- 151 *J. R. Boersma and J. H. J. Terwindt*. Neap-spring tide sequences of intertidal shoal deposits in a mesotidal estuary
- 171 *Roger M. Slatt and Nicholas Eyles*. Petrology of glacial sand: implications for the origin and mechanical durability of lithic fragments

- 185 *Azuma Iijima and Ryuji Tada*. Silica diagenesis of Neogene diatomaceous and volcanoclastic sediments in northern Japan
- 201 *David D. Swinbanks and James W. Murray*. Biosedimentological zonation of Boundary Bay tidal flats, Fraser River Delta, British Columbia
- 239 *Ryo Matsumoto and Azuma Iijima*. Origin and diagenetic evolution of Ca-Mg-Fe carbonates in some coalfields of Japan
- 261 *A. J. Moss, Patricia Green and J. Hutka*. Static breakage of granitic detritus by ice and water in comparison with breakage by flowing water
- 273 *Daniel Jean Stanley and Andrés Maldonado*. Depositional modes for fine-grained sediment in the western Hellenic Trench, Eastern Mediterranean
- 291 Book reviews
- 297 Forthcoming papers

## NUMBER 3

- 299 *Eric W. Mountjoy and Robert Riding*. Foreslope stromatoporoid-renaloid bioherm with evidence of early cementation, Devonian Ancient Wall reef complex, Rocky Mountains
- 321 *C. M. Bell*. Soft-sediment deformation of sandstone related to the Dwyka glaciation in South Africa
- 331 *Ali M' Rabet*. Differentiation of environments of dolomite formation, Lower Cretaceous of Central Tunisia
- 353 *S. K. Tandon and Devendra Narayan*. Calcrete conglomerate, case-hardened conglomerate and concretion—a comparative account of pedogenic and non-pedogenic carbonates from the continental Siwalik Group, Punjab, India
- 369 *Philip A. Allen*. Wave-generated structures in the Devonian lacustrine sediments of south-east Shetland and ancient wave conditions
- 381 *A. H. F. Robertson and N. H. Woodcock*. Bilelyeri Group, Antalya Complex: deposition on a Mesozoic passive continental margin, south-west Turkey
- 401 *Bruce H. Corliss and John D. Milliman*. The use of phillipsite in test construction of agglutinated deep-sea benthonic foraminifera
- 407 *D. A. Spears and M. A. Amin*. Geochemistry and mineralogy of marine and non-marine Namurian black shales from the Tansley Borehole, Derbyshire
- 419 *B. G. Jones*. Aeolian oriented clasts in beach sediments :
- 423 *Björn Buchardt and Stephen Weiner*. Diagenesis of aragonite from Upper Cretaceous ammonites: a geochemical case-study
- 439 *Richard L. Chambers and Brian J. Eadie*. Nepheloid and suspended particulate matter in south-eastern Lake Michigan
- 449 Book review
- 450 Forthcoming papers

## NUMBER 4

- 451 *Andrew R. Hurst*. A scale of dissolution for quartz and its implications for diagenetic processes in sandstones
- 461 *Donald J. P. Swift and Michael E. Field*. Evolution of a classic sand ridge field: Maryland sector, North American inner shelf
- 483 *J. S. V. Reddering*. A pre-split soft sediment core tube
- 487 *Gunver Krarup Pedersen*. Anoxic events during sedimentation of a Palaeogene diatomite in Denmark
- 505 *W. G. Nickling and M. Ecclestone*. The effects of soluble salts on the threshold shear velocity of fine sand
- 511 *Roger D. Flood*. Distribution, morphology, and origin of sedimentary furrows in cohesive sediments, Southampton Water
- 531 *Chinmoy Chakrabarti and Donald R. Lowe*. Diffusion of sediment on the lee of dune-like bedforms: theoretical and numerical analysis
- 547 *Kenneth A. Pisciotto*. Diagenetic trends in the siliceous facies of the Monterey Shale in the Santa Maria region, California
- 573 *J. R. Markello and J. F. Read*. Carbonate ramp-to-deeper shale shelf transitions of an upper Cambrian intrashelf basin, Nolichucky Formation, Southwest Virginia Appalachians
- 599 Forthcoming papers

## NUMBER 5

- 601 *Bernard J. Pierson*. The control of cathodoluminescence in dolomite by iron and manganese
- 611 *Gilles S. Odin and Albert Matter*. De glauconiarum origine
- 643 *Sarah Anne Reeckmann*. Relationships between lithology and diagenesis and a limestone-marl facies transition: an electron microprobe study
- 653 *Janusz Dominik, Augusto Mangini and German Müller*. Determination of recent deposition rates in Lake Constance with radioisotopic methods
- 679 *Khaled Medhioub and Jean-Pierre Perthuisot*. The influence of peripheral sabkhas on the geochemistry and sedimentology of a Tunisian lagoon: Bahiret el Biban
- 689 *Michael Ashton*. Carbonate tidal rhythmmites from the Middle Jurassic of Britain
- 699 *Nathan Hawley*. Flume experiments on the origin of flaser bedding
- 713 *Hanna Ruszczyńska-Szenajch*. Fossil remnants of up-turned debris bands in Pleistocene glacial deposits of Poland
- 723 *Richard Smosna and Steven M. Warshauer*. Rank exposure index on a Silurian carbonate tidal flat

## SHORT COMMUNICATION

- 733 *Emanuel Azmon*. Use of clay fabric to distinguish turbidites from hemipelagic siltstone

## DISCUSSIONS

- 737 *N. C. Janke*. The shape of rock particles, a critical review  
738 *P. J. Barrett*. Reply  
739 *N. C. Janke*. The shape of sand-sized crushed quartz particles  
740 *David Krinsley*. Reply  
741 Book reviews  
749 Forthcoming papers  
751 Announcement

## NUMBER 6

- 753 *Gary Kocurek*. Significance of interdune deposits and bounding surfaces in aeolian dune sands  
781 *J. K. Ghosh, B. S. Mazumder and S. Sengupta*. Methods of computation of suspended load from bed materials and flow parameters  
793 *Claude Froget*. La sédimentation argileuse depuis l'Eocène sur le plateau Vøring et à son voisinage, d'après le Leg 38 DSDP (Mer de Norvège)  
805 *Steven G. Fryberger and Christopher Schenk*. Wind sedimentation tunnel experiments on the origins of aeolian strata  
823 *R. T. Martin, F. Y. Gadel and J. P. Barusseau*. Holocene evolution of the Canet-St Nazaire lagoon (Golfe du Lion, France) as determined from a study of sediment properties  
837 *Michael A. Naylor*. Debris flow (olistostromes) and slumping on a distal passive continental margin: the Palombini limestone-shale sequence of the northern Apennines  
853 *David R. Veblen, David H. Krinsley and Mark Thompson*. Transmission electron microscope study of quartz microstructures produced by aeolian bombardment  
859 *Robert J. Hallermeier*. Terminal settling velocity of commonly occurring sand grains  
867 *James D. Marshall*. Zoned calcites in Jurassic ammonite chambers: trace elements, isotopes and neomorphic origin

## SHORT COMMUNICATIONS

- 889 *Gerald C. Nanson*. New evidence of scroll-bar formation on the Beatton River  
893 *Z. Lewy*. Maceration of calcareous skeletons  
897 *German Müller and Michael Oti*. The occurrence of calcified planktonic green algae in freshwater carbonates  
903 Obituary  
905 Erratum  
907 Forthcoming papers
